

THE WORLD'S LEADING MANUFACTURER OF LABEL DISPENSERS,
REWINDERS, UNWINDERS, SLITTERS & CORE CHUCKS

LABEL REWINDERS
LABEL DISPENSERS
LABEL UNWINDERS
SLITTING SOLUTIONS
COUNTING SOLUTIONS
INKJET COLOUR PRINTER SOLUTIONS

labelmate.com

MISSION

LABELMATE's mission is to make label printing processes easier, faster and more effective by developing smart and durable devices that support their operator before, during or after the printing or application process.

HIGHEST QUALITY

The most easy-to-use, heavy-duty, and reliable products of their kind, every **LABELMATE** Product is built to rugged industrial-quality standards. Our product quality is reflected in the unmatched warranty program of 3 years Limited Warranty.

INNOVATION LEADERSHIP

While others copy, we innovate. We offer you the most innovative, complete and reliable product portfolio available on the market.

MADE IN BELGIUM, GLOBAL PRESENCE

LABELMATE's sales, support, **product engineering and manufacturing operations** are based in the centre of Europe, in the South of Brussels, Drogenbos, BELGIUM, with products available in more than 70 countries around the world.

LABELMATE people are open-minded, knowledgeable and dedicated. Our entire team stays with you all the way.

Slitter/Rewinder

Heavy duty slitters &
stations

The most easy-to-use, heavy-duty, and reliable products of their kind, every **LABELMATE** Product is built to rugged industrial-quality standards.

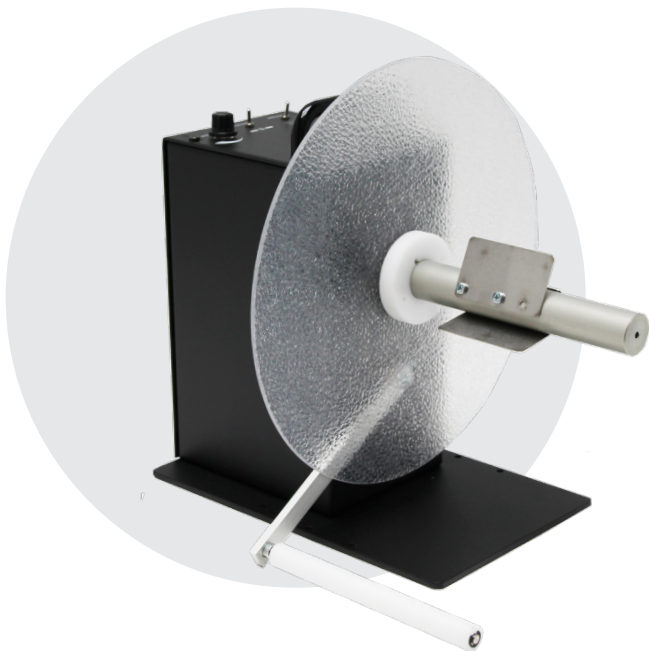

Label rewinders

Rewinders are efficient time savers that **rewind material into clean and uniform rolls.**

Label rewinders wind up labels into a roll as they come out of a printer. If you don't use a rewinder, you have to gather up the labels by hand once the printing job is finished. A rewinder is much more **convenient and saves you time.**

HEAVY-DUTY REWINDERS CAT-3/4/40G

"CAT" (Constant Adjustable Torque™) has made these quiet, easy-to-use rewinders the industry standard. With various core sizes, label widths, roll diameters and options to choose from, there is a rewinder to fit any job you may have.

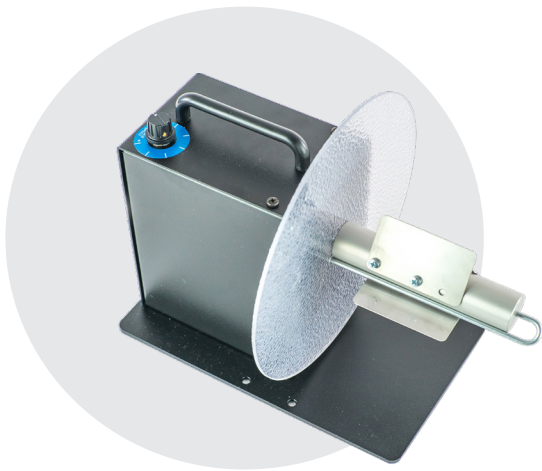

- ✓ Small footprint to fit on any desk
- ✓ Easy setup: attach the labels to the take-up core and ready to start
- ✓ Speed up to 125cm/sec to work with the fastest barcode printers available on the market
- ✓ An external command interface on the CAT-4 to support direct control start/stop by the barcode printer (check compatibility with your printer vendor)
- ✓ Large capacity for roll diameters up to 400mm

OPTIONAL

- Optional adjustable start delay on CAT-4 to allow backfeed without resistance
- The CAT-3/4-Standard has a fin-style core Holder
- The CAT-3/4-ACH employs an adjustable core holder enabling the use of varying core sizes
- The CAT-3/4-CHUCK includes a quick-locking "Quick-Chuck" core chuck permitting the fastest loading and unloading of cores and label rolls
- Adjustable Paper Guide (APG) to guide the outer edge of the labels to an even roll
- Foot switch for starting and stopping control by the operator

MINI-CAT REWINDERS MC-10/MC-11

The MINI-CAT rewinders are the world's most popular entry-level label rewinders to be used in combination with small desktop or mid-range barcode printers. With a specially designed bi-directional motor, they offer trouble-free performance at an incredible low cost.

OPTIONAL

- Adjustable Paper Guide (APG) to guide the outer edge of the labels to an even roll

- ✓ Small footprint to fit on any desk
- ✓ Easy setup: attach the labels to the take-up core and ready to start
- ✓ Large capacity for roll diameters up to 220mm
- ✓ MC-11 model employs an adjustable core holder (ACH) enabling the use of varying core sizes from 25mm to

MINI-CAT REWINDERS MC-INTEGRATED

The MINI-CAT Integrated Rewinder is the perfect supplement for any desktop barcode printer, creating a stand-alone unit to print and rewind the backing paper.

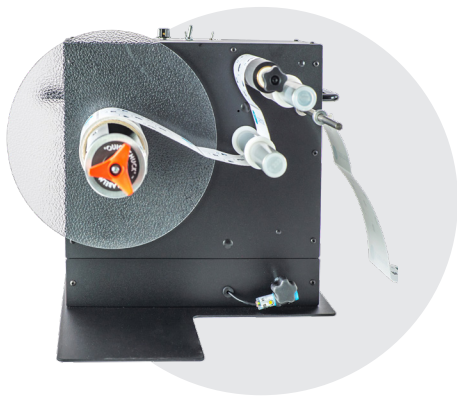

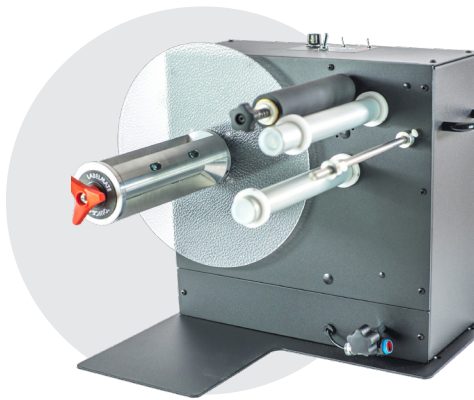

- ✓ Keeps your workplace clean and avoids backing paper falling on the ground
- ✓ Works with or without the peel-off function
- ✓ Speed up to 89cm/sec

Inkjet colour printer solutions

The **NEW ZCAT** Rewinder is the ideal solution for printers that back feed, as well as for extremely sensitive printers that cannot tolerate any rewind force without causing undesirable registration or artifact problems.

ZCAT-6/8/10 ZERO TENSION LOOP CONTROLLED LABEL REWINDER

- ✓ A free-hanging "loop" of label stock is created between the printer and the Tensioning Roller thereby eliminating all tension whatsoever on the printer.
- ✓ A special chassis-mounted sensor starts and stops the Rewinder based on the optimum depth of the loop.
- ✓ Large capacity for roll diameters up to 300mm
- ✓ Comes with a quick-locking "Quick-Chuck" core chuck permitting the fastest loading and unloading of cores and label rolls
- ✓ Handles labels up to 170, 220 or 255mm wide
- ✓ Available in left to right or right to left rewind direction
- ✓ Speed up to 125cm/sec

OPTIONAL

- Pre-set counter module to rewind a precise number of labels
- Outer guide flange ideal for narrow labels

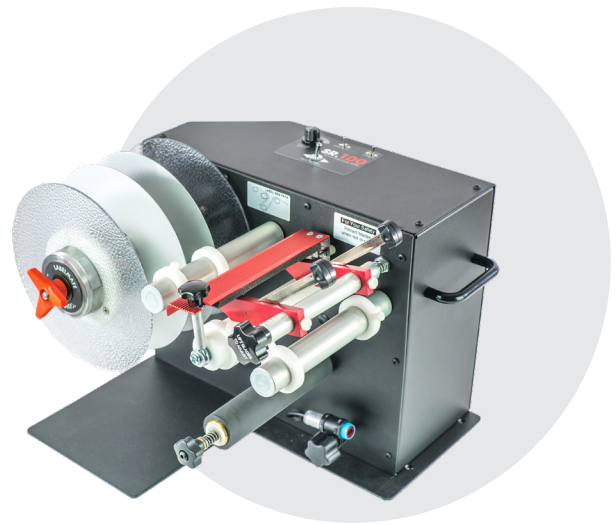

Heavy duty slitting solutions

Label slitters are a quick and easy way to slit down multiple-across label rolls into separate, individual label rolls. Labelmate offers complete "stand-alone" slitting stations (including unwinder, slitter and rewinder) as "in-line" solutions that can be placed at the output of any label-printer. Slitters have high-precision blades for clean and even slitting.

- ✓ "Zero-Tension Loop design" supporting smooth back-feeding of the printer
- ✓ Large capacity roll diameters up to 220mm
- ✓ Easy setup and flexible configuration (add and remove blades as required)
- ✓ Available in left-to-right or right-to-left rewind direction
- ✓ For label rolls up to 170mm wide (SR-6) and 255mm wide (SR-10)

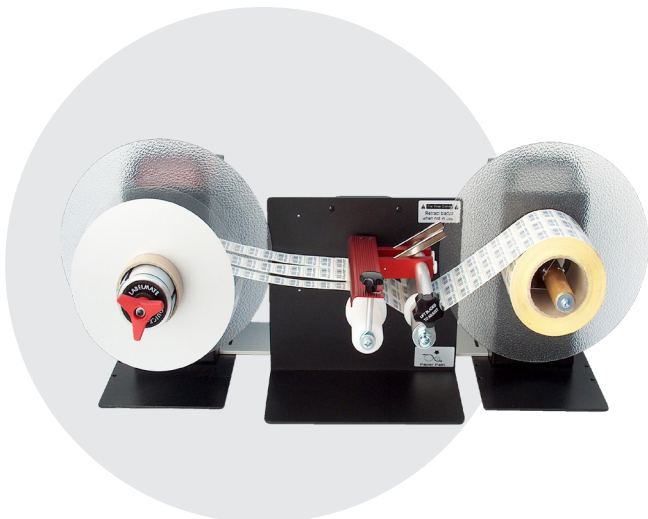

SR-6/SR-10 LABEL SLITTER & REWINDER

The SR-6 or SR-10 combination Label Slitter & Rewinder allows you to slit and rewind in-line directly from a printer without placing any tension whatsoever on the printer.

S-100 AND S-200 LABEL SLITTERS

- S-100 for labels up to 170mm wide
- S-200 for labels up to 255mm wide
- S-STATIONS: including all devices & accessories

- ✓ Perfect solution for slitting and rewinding narrow labels
- ✓ Up to 5 labels across
- ✓ Can be used in combination with:
 - A barcode printer and a rewinder (inline)
 - A rewinder & an unwinder (offline)

Powered label dispensers

LABELMATE label dispensers are a quick and easy way to **dispense individual labels**. They use a peel and present design, meaning that as the material passes through the dispenser the label is peeled away from the backing material and presented at the front of the unit where it waits to be picked up by the operator. With different models to choose from these label dispensers **can handle virtually any job** you may have for them.

LD-100 FOR LABELS UP TO 115MM WIDE

LD-200 FOR LABELS UP TO 165MM WIDE

- ✓ Small footprint to fit on any desk or packaging station
- ✓ Easy setup in less than 30 seconds
- ✓ Available in stainless steel (SS Version) (food & beverage, pharmaceutical market)
- ✓ Selectable speed (high-low) for applications with small or large labels

OPTIONAL

- Universal sensor models for special types of labels (black & transparent)
- Optional Adjustable Wearless Brake (AWB) system for labels with strong adhesives or very small labels
- Counter or pre-set counter for peeling off a precise number of labels
- Foot switch for continually advancing labels at the rate you choose
- Diameter extension to facilitate the use of labels rolls up to 300 mm
- Battery pack to work without external power supply for maximum mobility

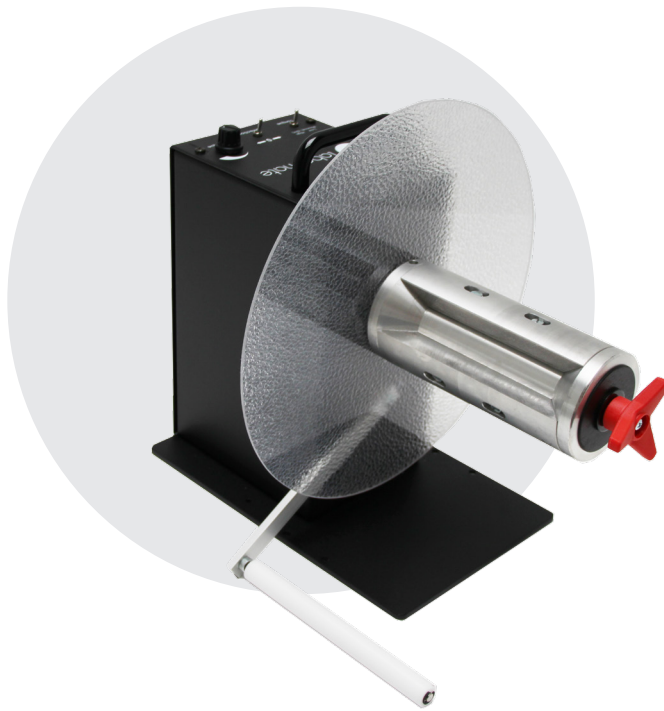

Label unwinders

Label unwinders provide a convenient way to **manage your supply roll of labels** as it feeds into a printer. You can use larger rolls of labels to minimize your unit label cost. The supply roll of labels does not have to be refreshed as often, **saving time and adding convenience**. External label rolls are always visible, making it easy to monitor the status of your label supply.

LABELMATE unwinders, powered or non-powered, provide the most advanced unwinding solutions available. They are **recommended for demanding production applications**.

POWERED UNWINDERS UCAT-3 AND UCAT-40

"CAT" (Constant Adjustable Torque™) has made these quiet, easy-to-use unwinders the industry standard. With various core sizes, label widths, roll diameters and options to choose from, there is a CAT-unwinder to fit any job you may have.

- ✓ Small footprint to fit on any desk
- ✓ Speed up to 125cm/sec to work with the fastest barcode printers available on the market
- ✓ An external command interface to support direct control start/stop by the barcode printer (check compatibility with your printer vendor)
- ✓ Large capacity for roll diameters up to 400mm
- ✓ Can be used as full featured rewriter without any special setup

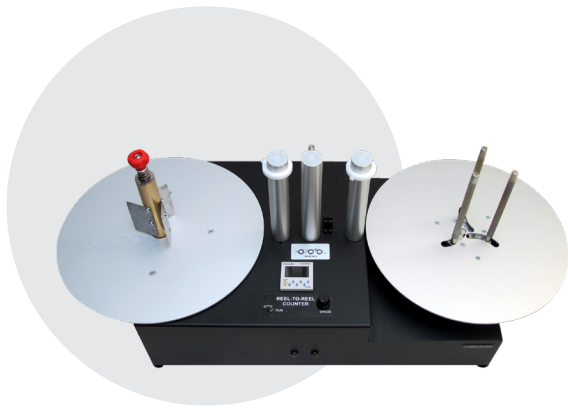

OPTIONAL

- Adjustabel Paper Guide (APG) to guide the outer edge of the labels to an even roll
- Foot switch for starting and stopping control by the operator
- UCAT-3-Standard has a fin-style core holder
- UCAT-3-ACH employs an adjustable core holder enabling the use of varying core sizes
- UCAT-3-CHUCK includes a quick-locking "Quick-Chuck" core chuck permitting the fastest loading and unloading of cores and label rolls (standard on UCAT-40)
- 10 Inch shaft to rewind labels up to 255mm wide
- 1 Inch shaft to handle cores of 25,4mm diameter

Counting solutions

Label counters provide a quick and easy way to **count the number of labels on a roll**. These "gap sensing" counters detect the gap in-between each label. The stand-alone units can be placed at the output of your printer allowing you to count the labels as they are printed. A rewinder will be needed to wind up the labels after they have been counted.

Off-Line counting can be done with either a **counting package** or a self contained **reel-to-reel unit**. Both units allow you to count the number of labels on a given roll, make large rolls of labels into smaller ones, change the direction of the labels coming off the roll or change to a different core size.

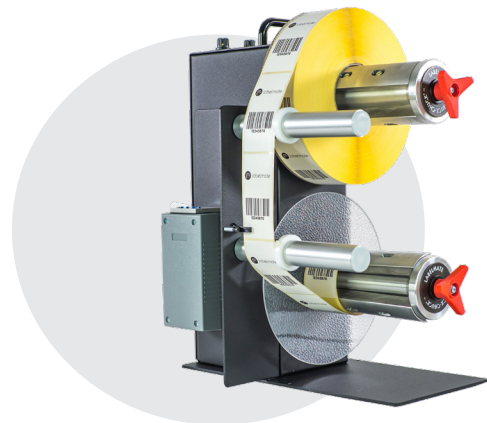

- ✓ Stand-alone counting stations with pre-set counter functionality
- ✓ Accepts rolls with a diameter up to 330mm
- ✓ Optional encoder for length measurement in Metric/British/American units
- ✓ Optional delivered with an ultrasonic sensor for transparent and dark labels
- ✓ Take-up shaft can be equipped with the Adjustable Core Holder (ACH)

- ✓ Inside wound to outside wound applications
- ✓ Reverse the order of serialized labels
- ✓ Rewind labels on a different core size
- ✓ Wind small rolls of labels from larger ones
- ✓ Strip matrix from die-cut labels inline with your printer
- ✓ Rewind a specific quantity of labels with the optional inspection and pre-set counter options
- ✓ With various label widths and core diameters along with Inspection and Counting options, this all-in-one rewind/unwind Station is the ideal solution for that roll diameter material you are working with.

TWIN-CAT-2 DUAL SPINDLE UNWIND/REWIND STATIONS

The Dual Spindle TWIN-CAT2-2 label rewinder/unwinder is a fast and easy way to deliver label rolls the way you want them!
